

Grapevine StewkleyGreen Oct 08

StewkleyGreen needs your help. They need people willing to do some home surveys a few (2-8) hours per month. A laptop computer would be useful but not essential. It is not difficult work and assistance will be given. Also some help from one or two people who are good at Excel logic formulas, and anyone who could help develop the website further would be very helpful.

Roger Crews said there had been further demand for the new survey to help reduce the cost of energy bills. And StewkleyGreen has helped people that have had difficulty in getting the 100% grants for loft and cavity wall insulation to obtain them; both offer a quick payback with the partial grant available to all.

Car/lift sharing is another way people are saving money. As a result of the high price of petrol and diesel it is fairly easy to save £20 per week by sharing with just one other person, when sharing with 3 others the savings really become significant. See the website www.StewkleyGreen.org.uk or contact Roger Crews 240 794 for more details on any of these items.
